# SECTIONAL DOORS

A garage door is one of the most important elements of finishing the house. It impacts both the look of the building itself and the comfort of the people living there. The door should be functional, warm, safe and aesthetically fit the facade.

**TAILOR-MADE PRODUCTS**

**MORE THAN 200 RAL COLOURS**

**WIDE VARIETY OF VENEERS**

## VENTE K2 RC

Narrow embossment is a popular design matching house of different styles. One of the advantages of such embossment is a profitable ratio of price to high quality.

### TEXTURE OF PANELS:

- SLICK VENEER
- SLICK RAL
- STRUCTURAL PAINTING
- WOODGRAIN DECORS
- WOODGRAIN RAL

## VENTE K2 RS

Wide embossment design will match both classical and modern houses. An interesting alternative for narrow embossment.

### TEXTURE OF PANELS:

- SLICK VENEER
- SLICK RAL
- STRUCTURAL PAINTING
- WOODGRAIN RAL

## VENTE K2 RF

A door without embossment looks smart and simple. It matches well different architectural solutions. The style of such door can be additionally enhanced by original decorative details.

### TEXTURE OF PANELS:

- SLICK VENEER
- SLICK RAL
- STRUCTURAL PAINTING
- WOODGRAIN RAL

# SECTIONAL DOORS

Krispol doors meet all these requirements. Sectional doors are most often chosen. The way of opening the sectional door allows to maximally use the space in the garage and in front of it.

**TAILOR-MADE PRODUCTS**

## VENTE K2 RM

V-profile is a design which gives doors a unique and modern look. An innovative form ideally matches the newest architectural trends.

### TEXTURE OF PANELS:

V-PROFILE

## VENTE K2 RA

Panel embossment recommended to people who value charm and warmth of traditional or rustic-style houses. Two embossment options are offered – long and short panels.

### TEXTURE OF PANELS:

- WOODGRAIN RAL

# PRECIOUS HEAT

## PANEL 40 OR 60 mm

KRISPOL sectional doors have one of the best thermo-insulation properties in the market:  $U=1,12 \text{ [W/m}^2\text{K]}^*$ , and it is only  $U=0,9 \text{ [W/m}^2\text{K]}^*$  for the warm doors VENTE K2 RFS 60. The doors are made of panels 40 or 60 mm thick and they are filled in with polyurethane foam and sealed along the whole perimeter and between the sections. We have also added two 'lips' at the bottom sealing between the panels and the ground.

The shape of the upper arch has been designed in such a way to optimally press the upper panel of the door to the lintel. The warm door VENTE K2 RFS 60 is made of thicker panels and is equipped with double sealing of the bottom panel, intersectional panels and additional perimeter sealing which levels the thermal bridges between the walls and the angle iron.

Panel with a thickness of 40 mm.  
 $U=1,12 \text{ [W/m}^2\text{K]}^*$

Panel with a thickness of 60 mm.  
 $U=0,9 \text{ [W/m}^2\text{K]}^*$

\* concerns the door of the parameters 5000 x 2500

# SOLID CONSTRUCTION

No matter how good the garage door looks outside, it cannot be forgotten that it must be a solid work. Thus, it is worth checking the interior look. The door mechanism is equipped with solutions strengthening the construction, facilitating the assembly in the garage, guaranteeing reliability and aesthetic look from inside. Every door is equipped with central hinges, additionally strengthening the construction.

## ANTI-CORROSION GALVANIZED SURFACE

We offer 6 types of track systems, including low SL that requires the lintel of only 8 cm. We are able to offer the solution for almost every type of a garage. All metal elements are protected against corrosion. We are one of the few producers in the market who paint the lateral hardware inside the sectional door the colour fitting the panels colour.

## CENTRAL HINGES

## PAINTED HARDWARE

## PERIPHERAL SEALING

## DOUBLE-LIP SEAL

## COMFORTABLE SERVICE

---

A comfortable garage door is easy to use, reliable and quiet. The comfort of use is provided by reliable automatics. The mechanisms used in our products are provided by the best and the most renowned producers. An easy and non-problematic use is guaranteed and the door can be installed in any "intelligent home" system and with alarm installations. The rolls with bearings are used in sectional doors. We have minimized the number of connections in guiding rolls. Thanks to these solutions the doors work quietly and smoothly. Each garage door produced by KRISPOL can be easily opened with one hand irrespective of the door size. It is facilitated by two torsion springs enabling the optimal door balance.

## SAFE USE EVERYDAY

We constantly enhance our products by implementing solutions increasing user's safety and protecting the mechanism work. Every sectional garage door is equipped with an additional protection to stop the door from falling if the spring breaks. The drive systems include the overload switch which lifts the door of approximately 10 cm, if the obstacle is found.

The automatic garage door can be equipped with a photocell, blocking the door from closing, if the obstacle is found within its clearance. The rolls installed in all doors can additionally be equipped with shields to protect fingers. Sectional door panels have been designed to obtain a safe shape.

### ROLLERS WITH BEARINGS AND WITH SHIELD ENSURE QUIET OPERATION

# FINE FINISHING

Final visual effect of the sectional garage doors is obtained by selecting colour, veneer for the shell embossment, and the texture of the panels. KRISPOL doors are available in six textures. To emphasize the individual character of your house, use suggested decorative details of a high-quality stainless steel. Decorative details of flat surface can be used in VENTE K2 RFS garage door and its look can match the decorative elements of the house entrance doors.

## DESIGN TRENDS 2018

### Woodec Turner Oak

Woodec Turner Oak is a unique veneer, which perfectly imitates wood patterns, providing user with an experience of real wood. When touched, the veneer faithfully reproduces wood structure, maintaining full durability of PVC. The veneer is scratch-resistant and very easy to clean.

Extraordinary "oak" nature of the veneer and its matte surface is suitable for many designs and arrangements.

### Concrete

For many years, concrete was considered unattractive material that should be hidden, but now its time has come. It is popular not only as a construction material, but also as a finishing material equal to glass, metal and stone. Industrial style became a permanent component of architectural trends. Now, nobody is surprised by raw brick walls, or an industrial lamp installed in the kitchen. It is a sign of good taste and innovation, which is an alternative to popular solutions.

## PRACTICAL SOLUTIONS

A garage is not only a place for parking a car. It sometimes serves as a room that requires additional facilities and practical solutions. A perfect addition to the garage door is the lateral door or built-in service door. It gives the possibility of entering the garage through a narrow threshold. The wheeled objects can go through the door and there is no need to open the whole garage door. You will also find a variety of additional items in our offer: glazed aluminium sections or windows in different sizes and shapes providing more light into the garage, ventilation grilles, bolts and locks. The gate can come with an ergonomically shaped knob or handle on both sides.

# ALTERNATIVE SOLUTIONS

---

## ROLLING DOORS AND SIDE DOORS

Rolling door is the constructional solution which allows to install the door in the garages, where we want to have the maximum free space directly under the ceiling in non-standard garages and utility rooms. The door opens vertically upwards, and the curtain after rolling fits into the box inside or outside the garage above the entrance.

Side garage doors, matching the main doors in colour and embossment type allow to enter the garage without opening the main door. There is a possibility of covering all door elements with a veneer and using matching decorative elements for the facade to look well. Available in two versions: single and double-leaf doors.

### 200 COLOURS

 WIDE VARIETY OF VENEERS

# ROLLING GARAGE DOORS

Rolling garage doors provide a solution for garages, in which the owners want to obtain the maximum free space under the ceiling, required in some types of garages and utility rooms. The door opens vertically upwards, and it is rolled into a box mounted above the entrance inside or outside of the garage.
